

MD AREFIN ISLAM RAMIN

Address: Yangzijin Campus, Yangzhou University, Hanjiang, Jiangsu, China
Phone: +86 182 5271 2143 || +88 015 8115 4672
Email: arefinraminz@gmail.com Portfolio: raminyzu.github.io
Github: github.com/raminyzu LinkedIn: linkedin.com/in/arefin-raminz

PROFILE

Software Engineering graduate from Yangzhou University with strong experience in backend development, full-stack web applications, machine learning, and biomedical signal processing. Developed production-grade web platforms using Django and contributed to real-world marketplace and communication systems. Designed and implemented an ECG Signal Quality Annotation System and a deep learning-based ECG classification model using a customized 1D ResNet architecture. Passionate about AI-driven healthcare applications, software architecture, backend engineering, and intelligent data systems.

EDUCATION

Yangzhou University	September, 2022-June, 2026
<i>Bachelor of Science in Software Engineering</i>	
GPA: 3.42 (83.9% average)	
Chittagong Port College	
Higher Secondary School Certificate in Science	July, 2018 – August, 2020
GPA: 4.83	

SKILLS

Programming Skills	Python, Java, JavaScript, C, C++, C#, SQL
Backend & Web Development	Django, REST API, JSP, Servlet, ASP.NET, Node.js, HTML, CSS, JavaScript
Machine Learning & AI	PyTorch, TensorFlow, Scikit-Learn, NumPy, Pandas, Deep Learning, Machine Learning.
Biomedical Signal Processing	ECG Signal Processing, Time-series Analysis, Data Annotation Systems, Signal Classification.
Database Systems	MySQL, PostgreSQL
Frameworks & Tools	Git, GitHub, PyQt5, Flutter, Qt Creator, LaTeX
Design & Productivity	Canva, Adobe Illustrator, Figma, Microsoft Office
Languages	Bengali (Native), English (Fluent), Chinese (Advanced)-HSK4 passed with 207 marks

RESEARCH INTERESTS

- Biomedical Signal Processing
- Deep Learning for Healthcare Applications
- ECG Signal Quality Assessment
- Time-Series Classification
- Machine Learning and Pattern Recognition
- Intelligent Healthcare Systems
- Computer Vision and Medical AI

Bachelor Thesis

Design of ECG Signal Quality Annotation System and Research on Classification Model
Yangzhou University, 2026
Developed a PyQt5-based ECG signal annotation platform for medical

experts.

- Built and processed a dataset of 11,983 ECG signal segments.
- Implemented signal preprocessing and normalization pipelines.
- Designed and trained a customized 1D ResNet deep learning model.
- Achieved 95.83% classification accuracy on unseen ECG test data.
- Applied PyTorch, NumPy, Scikit-Learn, and biomedical signal processing techniques.

PROJECTS

- 1. BongoChat — Social Communication & Digital Services Platform**
Developed and maintained a real-time social communication platform integrating messaging, user interaction, and digital payment services.
Role: Backend API integration, Database management.
Tech Stack: Django, Python, REST API, MySQL.
- 2. Shonirbhor — Local Services & Marketplace Platform**
Worked on a large-scale service marketplace platform connecting customers with verified local professionals, tutors, rental listings, and service providers.
Role: Backend Development, REST API Development, Database architecture
Tech Stack: Django, Python, REST API, MySQL.
- 3. Food Delivery Management System – Python & Django**
A full-stack food delivery system with secure user authentication and password hashing.
- 4. Hospital Management System – J2EE**
Web-based system for managing hospital; using Java EE technologies.
- 5. Employee Management System – C**
My first project in software engineering. A basic terminal-based application for managing employee records (ID, name, salary), developed in C as an introduction to structured programming.

HONORS & AWARDS

- **Second Prize at Chinese National Level** July-August 2024
China Collegiate Computing Design Competition – National Level
For the project “Chaohuo East: Intelligent Chinese Language Exchange Platform”
National Round (17th Edition)
- **Second Prize at Jiangsu Province Level** May 2024
China Collegiate Computing Design Competition – Jiangsu Provincial Level
Jiangsu Province Round (11th Edition)
- **First Prize at University Level** April 2024
Yangzhou University Selection Round
Internal University competition, 2024
- **First Prize at University** September 2024
21st “Sound of Spring” Club – Parade Aesthetic Education Activity at Yangzhou University
For the Sixth String Music “MixBuzz” Team
Awarded by the Communist Youth League Yangzhou University Committee
- **Certificate of Appreciation** 2021
Government of the People’s Republic of Bangladesh
For contributions as a volunteer of Corona Medicine Bank in the COVID - 19 vaccination program at Chattogram 250 Bedded General Hospital, Chattogram.

WORK EXPERIENCE

English Teacher January 2021-July 2022
Lucent Lion Tutorial
An educational institution dedicated to providing quality English language instruction and supporting students’ academic development, emphasizing interactive teaching methods, structured curricula, and continuous student

evaluation, with the aim of fostering communication skills, confidence, and academic excellence among learners.

**VOLUNTEERING
EXPERIENCE**

President Advisor Leo Club of Chittagong Karnaphuli Elite <i>A voluntary service organization which mainly focuses to work on Vision, Hunger, Eyesight, Diabetes and Childhood Cancer.</i>	July 2024-June 2025
Secretary Kattali Youth Council <i>The Kattali Youth Council empowers and engages local youth through community projects, education initiatives, and advocacy efforts, fostering positive change in the Kattali area.</i>	July 2022-June 2023
Assistant Organizing Secretary Cubing Chittagong <i>An organization to promote Rubik's Cube in Chittagong.</i> • To promote and organize competitions, events, and initiatives centered around the Rubiks Cube. • To foster a local community of Cube enthusiasts.	August 2019-Present
